Application/Control Number: 09/763,280

Art Unit: 1711

1. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is confusing because it isn't understood how a shoe sole foam could have such a low density.

- 2. Claim 14 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Claim 14 shows a broader range of density than the preceding claim.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Yukuta.

See Paper No. 11, paragraph 3.

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-4 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yukuta in view of Hicks.

Art Unit: 1711

See Paper No. 11, paragraphs 5-8.

- 7. Claims 1 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woods in view of Yukuta.
- 8. Woods discloses, in the table, a typical mattress foam having the density of the claims. He reacts polyisocyanate with isocyanate reactive ingredients in the presence of amine catalysts, additives and blowing agents. He differs from the claims by not including an anhydride component.
- 9. Yukuta teaches that the addition of an anhydride to a flexible foam improves the foaming stability (col. 3, line 46).
- 10. It would have been obvious to one of ordinary skill in the art at the time the invention was made to add an anhydride to the foam composition of Woods to improve the foam stability.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rachel Gorr whose telephone number is (703) 308-3608. The examiner can normally be reached on Mon., Tues., Thurs., Fri., from 7:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jim Seidleck can be reached on (703) 308-2462. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Application/Control Number: 09/763,280 Page 4
